Subject: Microsoft Settlement

As a citizen of the US and a resident of WA, under the Tunney Act
I wish to make the following statement:

I do not believe that Microsoft should be allowed to get off so
easy. I think they are a danger to innovation and competition
in the software industry, if not by their very size, then by
their overly-aggressive and anti-competitive acts in the past.
I hope that the organs of government that decide the fate of
Microsoft have enough dedication to the US and the American people
to not succumb to influence of Microsoft.
